

Strategy for Capacity Building for Ecological Sanitation

Dr. Jasveen Jairath
Regional Coordinator
CapNet South Asia

Strategy of Capacity Building
derives from strategy for Action
derived from plans that entail
objectives

Need Assessment

Obstructions in the path of Action plan to reflect
CB needs

- Need for FLEXIBILITY in design of CB strategy

- Baseline analysis of Area –

- Social
- Geographical
- Hydrology status

- Spaces for intervention

- Choice of technology for Eco-San
- Strategy of Action
- CB needs and time line

Critical Capacities

- Advocacy and Social Mobilization
- “Process” leading to Action/Physical Structures
- Establishing a “System” through which Eco-San facility is created, operated, maintained and up scaled.
- Governance Capacity
- Embedding in Public Institutions.

Two sets of issues

- Whose Capacity? and For What?
- How ? and When?
