**North East
Regional
Agri-FAIR**
10-12 February, 2012
Assam Agricultural University

Organized by:
Assam Agricultural University
at
Khanapara Campus, Guwahati - 781022

Sponsored By:
Department of Agriculture & Cooperation
Govt. of India

North East's
MARCH TOWARDS FOOD SECURITY

Programme

Objectives

North Eastern Region of India is known to have hidden potentialities to increase agricultural production by 3-4 folds through input optimization and other technological supports. Inclusion of the state of Assam in 2nd Green Revolution programme is a pointer towards harnessing such potential. Although, Assam Agricultural University - the Feeder University of North East India has been taking a lead in ushering in technology led agricultural renaissance in the region, it has fortunately received a shot on its back in the form of a support from Department of Agriculture & Cooperation, Govt. of India to organize North Eastern Regional Agri Fair at Guwahati. The University is trying to encash this opportunity to bring in technology awareness among the farming community of the region by way of arranging a meaningful event showcasing the technologies under it's as well as other research agencies' possession. Development departments particularly from the state of Assam are also being roped in to benefit the farmers with the available schemes under these departments.

The main purpose of the event is to showcase the agriculture and allied science technologies as well as development of schemes operated by the state government to the farming community and other stakeholders of North East India so that they can avail these opportunities for optimizing production and productivity of crops, animals and fishes.
