

Sangam Charitable Trust and Aakanksha Seva Sadan present:

BioSand Water Filter Training *Safe drinking water is a right for all!*

BioSand Water Filters can remove up to 99% of bacteria & viruses, and further eliminates worms, parasites, amoebae, protozoa, metals, and arsenic, **providing safe water for a family or community.** *Learn how to eliminate waterborne illnesses!* **BioSand Filters** are currently being used in several countries, and in multiple locations in India: Karnataka, Tamil Nadu, West Bengal, Assam, Maharashtra, etc. They are used in homes, schools, hostels, and clinics. *The results have been astounding!*

THE FIVE DAY TRAINING WILL COVER:

- **BioSand Filter** theory and design
- Hands-on fabrication, testing, assessment, and trouble-shooting
- Community health and sanitation training
- Local implementation models and business planning
- Work with others from around the world implementing this simple, eco-friendly, low-cost household technology
- **Trained & Certified trainers** from various parts of India will be conducting the training.

Following completion of the class, participants will receive certifications and will be eligible to train others in **BioSand Water Filter** fabrication, and become part of our *global family*.

COST: Rs. 4000 includes tuition, food, and accommodations

PARTICIPANT PROFILE:

- Must speak English or Hindi
- Has an awareness of the need for *safe water*
- Motivated and prepared to implement the Biosand Filter project
- Capable of organizing projects and is a decision-maker
- Has shown exemplary *leadership* and is *inspirational* to others
