

## About us

The Confederation of Indian Industry (CII) works to create and sustain an environment conducive to the growth of industry in India, partnering industry and government alike through advisory and consultative processes.

CII is a non-government, not-for-profit, industry led and industry managed organisation, playing a proactive role in India's development process. Founded over 117 years ago, it is India's premier business association, with a direct membership of over 7100 organisations from the private as well as public sectors, including SMEs and MNCs, and an indirect membership of over 90,000 companies from around 250 national and regional sectoral associations.

With 63 offices including 10 Centres of Excellence in India, and 7 overseas offices in Australia, China, France, Singapore, South Africa, UK, and USA, as well as institutional partnerships with 223 counterpart organisations in 90 countries, CII serves as a reference point for Indian industry and the international business community.

## About CII - Triveni Water Institute

CII-Triveni Water Institute has been set up in Jaipur, Rajasthan, with a MoU signed between Government of Rajasthan and CII during Water Summit 2006 at Jaipur. The Core Purpose of the Water Institute is to address the critical aspects of Water at National level and State level.

In view of the looming water crisis the CII-Triveni Water Institute has developed a plan to provide a comprehensive solution towards efficient water management. A few critical areas which are of long term business interests to CII-Triveni Water Institute will be Industrial Water treatment, Municipal Water supply & Waste water treatment, Water shed

development, Rain water Harvesting, Community based drinking water projects, Drip irrigation projects, Urban and Rural Sanitation.

CII-Triveni Water Institute has been rendering water management services to various end users in industries and to the community as a whole. The services include Preliminary water survey, detailed water audits, training programs, developing Public Private Community partnership projects (PPCP) in water resource management under the auspices of India Business Alliance on Water (IBAW) and organizing events such as National Awards for Excellence in Water Management in industries, Water Investor's meet and the Watersummit.

## About GIZ

The services delivered by the Deutsche Gesellschaft für Internationale Zusammenarbeit (GIZ) GmbH draw on a wealth of regional and technical expertise and tried and tested management know-how. As a federal enterprise, we support the German Government in achieving its objectives in the field of international cooperation for sustainable development. We are also engaged in international education work around the globe. GIZ currently operates in more than 130 countries worldwide.

## About IGEP

The Indo-German Environment Partnership (IGEP) Programme is a partnership programme between the Ministry of Environment and Forests (MoEF) of the Government of India and the Deutsche Gesellschaft für Internationale Zusammenarbeit of the Government of the Federal Republic of Germany.

# One day National Workshop on Common Effluent Treatment Plants in India

**Theme:** Issues, Challenges, Opportunities & Way forward  
23rd November 2012, CII-Godrej GBC, Hyderabad

Confederation of Indian Industry

## Introduction

Promotion of industrial activity is widely seen as a desirable way to achieve sustainable development; for that result, however, their pollution problems, among others, must be overcome. To deal with the effluent from small, medium and large enterprises the concept of Common Effluent Treatment Plan (CETP) was introduced with a hope that not only it would help the industries in pollution abatement but also as a step towards the clean environment.

The concept of CETP is aimed to manage water pollution caused by the heterogeneous nature of the effluent from different industries. With the growing pace of industrialization these CETPs are unable to cater to the need of the industrial clusters, which has resulted in bypassing the treatment and directly discharging the untreated effluent in water bodies. The CETPs also faced many operational and institutional problems as many participating industries started withdrawing from the scheme.

Against this background CII along with GIZ is organizing a "One day National workshop on Common effluent treatment plants" to have a focused discussion on the key issues, challenges and opportunities in Common Effluent Treatment plants (CETPs) for waste water treatment in India.

## Objective

The objective is to gather key inputs and suggestions on developing a successful working model for CETP in India from Government, technology providers, industry, infrastructure developers, investors and consultants.

## Target audience

- Government
- Industry
- Technology providers
- Infrastructure developers
- State Industrial Development Corporation
- Investors
- Consultants
- Academicians

## Focus

- Technical models for the CETPs- innovative, financially viable solutions
- Business models for the CETPs-public private partnerships etc.
- Implementation and management models for the CETPs- user charges, roles of parties involved etc.

## Benefits

- Excellent platform for information exchange & dissemination on various issues of CETPs
- Gain first- hand knowledge on the latest concepts & best practices in CETPs
- Platform for networking with stakeholders
- Explore the untapped business potential in the sector
