UNLEASH Hacks Bharat

13 CLIMATE ACTION

8 DECENT WORK AND ECONOMIC GROWTH

India is the **5th most vulnerable country** to climate change and has **600+ million people dependent on natural resources** for their survival. Developing India should mean mainstreaming climate resilience in the recovery and development frameworks. Integrating affected communities is essential in designing impactful solutions, therefore, this hack will focus on framing problems from a fresh and inclusive lens

UNLEASH Hacks are localized, scalable, and cost-efficient innovation processes designed to address sustainability challenges in specific contexts around the world. Through a collaborative 2-day process of this hack, organized by India UNLEASH Alumni, passionate youth will have the opportunity to work with local stakeholders and communities to solve problems and contribute to the **SDG 13 & SDG 8**.
