

Consortium for DEWATS™ Dissemination (CDD) Society

Organisation Profile:

The Consortium for DEWATS™ Dissemination (CDD) Society is a non-governmental organisation, initiated as a network in 2002 and registered formally as non-profit society in 2005. The Society aims to promote better environment especially for less privileged, disadvantaged and marginalised groups. Since its inception in 2002, CDD Society has worked on Community Based Sanitation, Citywide Sanitation Planning, Decentralised Solid Waste Management, and Decentralised Wastewater Treatment Systems. CDD has implemented by 400 plus sanitation projects across India and abroad. The Society provides the above mentioned services through direct field implementation and transfer of knowledge to relevant implementation oriented stakeholders.

Job Title: Project Manager

Project: Strengthening the Operation & Maintenance Sector for Servicing Decentralized Urban Sanitation Infrastructure in Karnataka, India

Project Duration: December 2013 to November 2015

Location: Bangalore. Requires frequent travel to other cities of Karnataka

Reporting to: Coordination and Direction team of CDD

Key Responsibilities: The Project Manager is responsible for the overall planning, implementation, monitoring and reporting of the project under the supervision of the project partners and CDD Society. S/he will manage the technical, human, financial and other resources assigned by the Project and is responsible for creating and nurturing a team of around 5 to 10 members, which includes Senior Project Engineers, Project Engineers, Project Coordinators, Social Specialist, Urban Planners, Documentation Specialist and Support Staff who will successfully implement the Project. The Program Manager will provide excellent technical expertise in engineering of water and sanitation systems, and also demonstrate superior project management and team leadership.

Compensation offer: Commensurate with experience and qualifications. Salary would not be a constraint for the right candidate and would be above the average standard.

Background: The Bill & Melinda Gates Foundation has awarded above tilted project grant to a German NGO called BORDA. BORDA in turn have selected CDD Society for implementation of the project. The project aims to support improved (enabling environment) O&M services for decentralised urban sanitation infrastructure in one city of the State of Karnataka, India.

Qualification and Experience:

Engineering degree (civil, mechanical, electrical and environment) with at least 7 years work experience and post graduate degree in Management will be preferred. Experience of working with the government and prior experience of managing water and sanitation projects or working with an INGO would be an added advantage.

Mail your CVs along with a cover letter to recruitment.bgl@cddindia.org no later than **November 18th, 2013**. Only shortlisted candidates would be contacted. Please contact Ms. Molly at 080-28486700 for more information.
